TELEPHONE. Pittsville, Md. 301-835-2101 day or night, and 301-835-8082 night only.

BUSINESS HOURS. We are open from 7:30 a.m. to 4:00 p.m. Monday through Friday, except during the spring digging season when we are open from 7:30 a. m. to 5.00 p. m. Orders already dug may be picked up Saturday morning. Also open on Saturday afternoon by appointment. Not open on Sunday.

ORDER IN ADVANCE. To be sure of getting your plants at the desired time, please place your order well in advance.

ZIP. When ordering, please give us your ZIP code No.

"LINING-OUT stock" explained. Many plants in this price list are marked with an asterisk (*) and classed as lining out stock. This means that the plants, of the size so marked, are not generally considered large enough for landscaping. Rather, they should be lined out in rows, or grown in beds or cold frames where they can be protected, until they are large enough for landscaping.

"POTTED plants" explained. When we list potted plants, the size listed is the size of the pot, not the size of the plant. Hence, "4 inch pot plants" means the plant is growing in a 4 inch pot. Note: when we sell the plant, we remove the pot and wrap the plant as dictated by its size and root development.

PRICES. Prices quoted here are f. o. b. this nursery and are for "field average" plants. If the customer selects extra specimen material, an additional charge will be made.

We will furnish one to four plants of a variety and size at each rate; five to 24 of a variety and size at the ten rate; 25 to 249 of a variety and size at the 100 rate. If a variety is listed at 10 rate and not at the each rate there will be an additional charge of 50 cents per plant if less than 5 are ordered.

MINIMUM ORDER. The minimum order that will be accepted is \$5.00 excluding sales tax and packing and shipping charges.

TERMS. Orders that are to be shipped must be accompanied by remittance in full. Orders to be picked up here must be accompanied by 25% deposit with the understanding that if you cancel your order after we have dug the plants, the deposit is forfeited as payment to us for digging and re-planting. A finance charge of 1% per month (12% per annum) is assessed on amounts 30 days or more past due.

READ BEFORE ORDERING (cont.)

PACKING AND SHIPPING. When plants are shipped, the customer pays packing and shipping at cost. In ordering, please add 10 percent of the cost of the plants to cover packing and shipping. If the actual cost differs from that 10 percent, we will refund or bill you accordingly.

MAXIMUM SHIPPING SIZE. Due to the costs of packing and shipping, we do not ordinarily ship plants that are more than 6 feet tall. If the customer specifically authorizes it, we will in appropriate cases, prune a large plant back to proper shipping size.

TELL US HOW TO SHIP. We ship by parcel post, motor freight, railway express, United Parcel Service and bus (Trailways and Greyhound). If you desire shipment by UPS or bus, please give us your telephone number. We can arrange shipment by truck if the size of the order warrants paying for a full load.

PICK-UP ORDERS. If you want to pick up your plants here, please place your order in advance so that we can have it ready for you.

CLAIMS AND GUARANTEE. Claims for shortages, errors, or any cause, must be made within 5 days after receipt of shipment. In no case are we liable for more than the invoice price of the plant. We guarantee to ship good, healthy stock but we do not assume any risk or responsibility for transportation, growth, or life of the plants after they leave this nursery. If your plants are damaged or excessively delayed in transit, make this notation on the carrier's delivery receipt and file a claim against the carrier immediately. Please note that our responsibility for delivery of your plants ends upon our delivering them to the carrier.

PRICE SCHEDULE FOR BALLING AND BURLAPPING. In case of those plants specifically listed B&B, the prices in this catalog include the cost of balling and burlapping. Others are shown at bare root prices. A general guide for the additional charge of balling and burlapping follows:

Height of Plant	Charge
2½ to 3 ft.	\$3.00
3 to 4 ft.	3.75
4 to 5 ft.	5.25
5 to 6 ft.	6.75

These charges may vary depending upon the variety of plant involved.

PLANTS NOT LISTED HERE. We have many plants which are not listed in the catalog because they are too large to ship, or because we have them in too small quantity. The large ones, in many cases, would be of particular value to landscapers. We welcome your inquiry for materials to meet your specific needs.

TIME OF SHIPMENT. We can ship throughout the year except during extreme winter weather.

CONDITIONS OF SALE. All orders are accepted on the condition that they shall be void if our plants are subjected to conditions beyond our control.

CATALOG ARRANGEMENT

This catalog is arranged in three sections. The first is azaleas and rhododendrons by family grouping. The second section is our ornamental stock which is listed alphabetically by botanical name. The third section is devoted to strawberry plants and miscellaneous items.

EXPLANATION OF PLANT

DESCRIPTION TERMS

Immediately following the names of our plants we have entered a zone number from the Hardiness Zone Map which follows and abbreviated descriptive terms as indicated below.

- D = deciduous
- E = evergreen
- GC = ground cover
- P = perennial
- S = shrub
- SE = semi evergreen
- S/T = large shrub or small tree
- B & B = balled and burlapped
- FG = field grown
- * = lining out stock
- RC = rooted cuttings
- S = seedlings
- Spec. = specimen
- trans. = transplants

HARDINESS ZONE MAP

The zone number which we give is the northernmost zone in which we believe the plant to be hardy under average winter conditions. It should be noted that a plant's ability to survive the winter is not determined solely by the minimum temperature to which the plant is exposed but is also affected by the plant's general health, the soil moisture content, and the exposure to scalding sun and wind. Our assignment of a particular zone number to a plant should not be construed as a guarantee that the plant will survive in that zone. We can make no warranty, expressed or implied, as to the ability of any plant to survive after it has left this nursery.

GABLE'S HARDIER AZALEAS

Mr. Joseph B. Gable of Pennsylvania spent almost a lifetime working with Azaleas and Rhododendrons. Many years ago he started breeding azaleas with the hopes of producing a hardier type of evergreen azalea in a good color range. He had wonderful success and is now recognized as a leader in the field.

These varieties will average hardier than Hinodegiri and much hardier than the other Kurumes.

GLENN DALE AZALEAS

Since we began growing Glenn Dale Azaleas, in 1941, they have become rather widely known and the demand for them has increased rapidly. Their ability to survive in areas where evergreen azaleas have been previously winter-killed has made them very popular.

Sometimes, when their flowers are described as striped or flaked, there will be scattered branches of solid colored flowers. Those branches should be cut out. This characteristic is inherent to the variety, not a fault of the nurseryman.

KAEMPFERI HYBRID AZALEAS

In the Kaempferi Hybrids—the result of crossing Kaempferi and Malvatica—there has been obtained the hardiest type of evergreen Azalea, with a good range of form and color in the flowers. Several year's tests have demonstrated that these Hybrids are just as hardy as Kaempferi, until now the hardiest of the evergreen sorts.

KURUME AND RELATED HYBRID AZALEAS

The Kurume Azaleas are some of the most showy of all flowers for the garden. They are also well adapted to forcing—thousands of them being sold for Easter, Mother's Day, and Decoration Day. They are comparatively easy to grow and make a wonderful display. Many of the varieties are hardy out-of-doors as far north as Long Island.

HEATHER

For convenience we have listed both the Callunas (Heathers) and the Ericas (Heaths) under one heading. Typically the Ericas bloom in the spring and the Callunas bloom in the fall. However, some varieties, particularly among the Callunas, are erratic. We have seen the Callunas bloom in June and then again in the fall. Calluna vulgaris 'Tib' has bloomed in June, Oct., Nov., and Dec. at this nursery. Colors following variety name indicate the color of bloom.

EDCO IRON

For use in the control of chlorosis in azaleas, gardenias, roses, citrus crops, etc.

Results to date have shown Edco Iron to be very effective in correcting chlorosis in the above crops. Chlorosis may be caused by the excess or deficiency of several major or minor nutrient elements in the plant besides iron, and it may be caused by an excess of water or its lack, but Edco Iron commonly seems to help correct the effect if not the cause of these several conditions.

Full directions for using with each lot.

Prices: 1 lb. \$2.90; 10 or more lbs. at \$2.70 per lb.

ALUMINUM PLANT TAGS

Very convenient to use. Lasts years. $\frac{3}{4}$ inch wide, $3\frac{1}{2}$ inches long.

Made of thin aluminum. Can be embossed with ordinary lead pencil like writing on an ordinary label. Permits writing label in field. 100 for \$5.00, 500 for \$20.00, 1000 for \$35.00. Postpaid.
